PROFILE

Frontend developer with 6 years of experience building web applications with React, Next.js and TypeScript. I have worked on both product and client-facing applications, modernized existing systems, and contributed to larger frontend codebases where maintainability, data handling, application state and team collaboration are important.

EMPLOYMENT HISTORY

Freelance

Prague

Sept 2025 — May 2026

- Development and maintenance of frontend projects for various clients.
- Building components and pages in React / Next.js.
- UI improvements and refinement of existing solutions with a focus on maintainability.

Frontend developer, BizMachine

Prague

May 2024 — Jun 2025

- Rewriting and modernizing the Prospector platform for company data search and segmentation from Next.js 10 to Next.js 14.
- Building new screens and components using Tailwind CSS and shadcn/ui.
- Migrating the data layer from REST API to GraphQL, including work with generated types and hooks.
- Developing search, filtering, segmentation, exports and CRM integration features.
- Managing application state with Zustand, improving performance and supporting E2E testing in Playwright.

Freelance

Prague

May 2023 — Jan 2024

- Maintenance and development of client websites.
- Building new components and pages in React.
- Collaboration on the frontend part of an internal client product.
- UI updates and implementation of design changes.

React Developer, Coding Bear

Prague

Feb 2022 — May 2023

- Developing the frontend layer of a workflow / case-management platform in React and Redux.
- Extending a library of configurable widgets for dynamic process forms.
- Designing a form validation layer and standardizing required/error states across widgets.
- Developing case overview, process navigation, customer branding and specialized widgets.
- Working with REST API, i18next localization and an SCSS-based UI system.

Web Developer, Sherwood Digital

Prague

May 2021 — Jan 2022

- Developing frontend parts of client e-commerce projects and internal product tools.
- Working on a B2B e-shop checkout flow in React and Redux — cart, addresses, shipping/payment, order summary and confirmation.
- Managing checkout state with Redux/Thunk, building forms with react-hook-form / Yup and integrating REST API via Axios.
- Developing frontend modules for an internal platform — news, wiki, events and daily feedback, including routing, forms, API data and localization.
- Building reusable UI components in a shared React library and implementing responsive e-commerce templates in LESS/SCSS.

Web Developer, Socialbakers

Prague

Sept 2019 — Apr 2021

- Maintaining and developing Socialbakers websites — main website, careers website and WordPress blog.
- Building new pages and components, updating existing UI and fixing production bugs.
- Rewriting an older part of the website from PHP to Next.js.

Junior Software Developer, Unicorn

Prague

Feb 2019 — Aug 2019

- Developing internal applications on both frontend and backend.
- Working with React on the frontend and Node.js on the backend.
- Implementing smaller features, updating existing parts of the application and fixing bugs.

uuApps Designer, Unicorn

Prague

Oct 2016 — Feb 2019

- Providing user and administrative support for internal systems.
- Collecting and clarifying requirements for further development of internal applications.
- Testing new features and communicating with users and the development team.

EDUCATION

Secondary Technical School of Fashion

Prague

Sept 2007 — Jun 2011

Clothing Industry

Studies completed with a matriculation exam

COURSES

First Certificate in English, University of Cambridge

Jun 2012
